Career summary

Steve brings a wide range of practical experience to Infield's viticultural team, water management projects and an empathetic approach to projects involving environmental and sustainability issues.

In the early part of his career, Steve was employed on various orchards, cropping and grazing properties in the Barossa Valley, Riverland and Lower Northern regions of SA.

In the twenty years following his graduation, Steve has accumulated a wealth of experience in the wine industry managing vineyards in the Barossa and Eden Valleys where he co-ordinated and supervised staff and was directly involved in major new property developments, water infrastructure development and rehabilitation, and large scale re-vegetation projects.

An interest and involvement in water and environmental issues led to a period as land management advisor with the Natural Resource Management Board and further involvement in the North Para Catchment Advisory Committee, North Para Natural Resources Management Committee and the Barossa Landcare Group.
